Rev.1

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1

A generally flat and smooth surface which is providing a mounting section along the long axis of said surface without raised features or indentations that interfere with direct attachment of said remote control units..

Said surface is defined by two generally parallel sides a perpendicular side and opposite connected perpendicular new surface protruding some distance creating a new surface. This new surface extends from said long axis boundary at a defined angle into a new plane to form an upswept portion. Opposite bottom surfaces are also then defined. In addition said upswept surface may have a slot or hole through it normal to this new surface. In addition some form of connected fastener such as two sided adhesive tape or hook and loop strips are used to attach the remote control units to said generally flat and smooth surface which is providing a mounting section.

Claim 2

A remote control holder according to claim 1, wherein:

Injection molding is used wherein the bottom side 18 may be recessed or cored out as a way of both strengthening while saving material volume and weight.

Claim 3 (deleted)
